OUT OF SALE 7, 18, 26, 35, 36, 39, 46, 72

LOT 48 buyer will receive a pregnant recip with the guarantee of a live heifer calf due on 8/14.

LOTS 49 & 51 are short bred with estimated calving dates in November. After the sale they will return home until a positive 45-day ultrasound preg check is performed. They will be fed at Bruning Farms expense and delivered at the buyers earliest convenience. Lot 51 has a bull calf on her side that will stay at Bruning Farms.

FEMALES CALVED:

Calves have received Endovac, MultiMin, and Inforce 3 at tagging.

LOT 60 heifer calf born on 2/10 by Bruning Disciple 2016 weighing 76 lbs.

LOT 63 heifer calf born on 2/13 by 3F Epic weighing 90 lbs.

LOT 60 heifer calf born 1/25 by 3F Epic weighing 76 lbs.

3F EPIC SIRED CALVES There are two calves sired by 3F Epic recently calved by cows on the sale. This past fall Epic was discovered to be a carrier of Neuropathic Hydrocephalus (NH) which is a lethal genetic defect caused by a recessive mutation. Although the calves are healthy, they could still be NH carriers. We have taken tissue samples of the calves that are born and sired by 3F Epic. We will test the calves to verify their NH status. If they are NH carriers, the buyer will be credited for our estimated price of the calf at weaning. Talk with Reiss for more details.
